

QA ASSIGNMENT

8 October 2018

1. Write an automated test UI for signing in on the web application:

<https://stackexchange.com>

With an account already existing in their database. (Stackexchange/Google account)

Test Requirements:

1. Can create your own set of test cases and test suite.
2. Can use any testing framework of your choice.
3. Can include any features to make test suite more usable and maintainable and readable.
